Liquefied Petroleum Gas Report

A monthly publication which includes inventories of liquefied petroleum and liquefied refinery gases located at plants and refineries, and in underground storage, by areas, and by individual products.

JANUARY 1983

American Petroleum Institute
2101 L Street, Northwest
Washington, D.C. 20037

Month Ending January 31, 1983

NOTICE

In order to reduce the burden on reporting companies in the monthly program, the API has made certain changes in the Liquified Petroleum Gas Report. These changes are predicated on the use of DOE/EIA forms in lieu of the consolidated API form. Since the API staff must process far more reports, the API survey has been delayed. The API staff apologizes for the inconvenience.

Starting with this issue, the Liquified Petroleum Gas Report will no longer report Normal Butane and Other Butanes separately. They are now consolidated into one product category entitled Butane. For your convenience, the API will combine last years data to reflect this change.

The API has also added Natural Gasoline to its reporting system. This product has been combined with Isopentane, and will be reported as Natural Gasoline and Isopentane combined.

Underground Storage is still being reported, however, the API may find it necessary to drop this section in the future. The API is constantly looking for better ways to improve its reporting system in order to bring you the most up-to-date, accurate information available. The API staff thanks you for your patience and cooperation during this period of change, and looks forward to your continued support when future changes are made.
